MASTERING THE ACTION CYCLE
For Individuals and Cohorts

“The most important step is always the first one.” — Anonymous

For a Change
Action Cycle Development

UNIT 1: Getting Started (1 Week)
• How To Get Better Results
• Mapping The Vision

UNIT 2: Constructing the Action Cycle (1 Week)
• Phase 1(a) — Getting off to a strong start

UNIT 3: Constructing the Action Cycle (1 Week)
• Phase 1(b) — Mid-Month Actions
• Phase 1(c) — End of Month Activities

UNIT 4: Success Elements (1 Week)
• Execution Barriers
• Mastery Practice: Reflection

Someone once said that the most common cause for failing is not understanding failures’ causes. And that means you must seek and fix weaknesses. When it comes to taking action, you have two options. They are:

Option 1. Self-Pace Learning via the eBook
Option 2. Get Mentoring and Coaching

“Practice makes perfect.” — American saying

Phase 1: The Action Plan Development (30 days)
It would be a one-month process to develop a 30-day Action Plan.

Phase 2: The First Practice Cycle (30 Days)
The first 30 day cycle is learning about the sources of resistance. The second cycle is learning from the first one and learning from mistakes. After than, it’s hoped that most individuals can go it alone.

Phase 3: The Improvement Cycle (30 Days)
This is the tough part and a major reason for having a guide. Your mind will resist change. It likes the way things are. That’s why we do two cycles.
